Junior Software Developer

Education:

Louisiana Tech University, Ruston, Louisiana
Bachelor of Science, September 2018 - May 2022
Major: Computer Science
Concentrations: Cyber Security and Cloud Computing
Cumulative GPA: 3.511

Courses Taken: Calculus, Data Mining, Software Design, Programming Languages, Adv. Data Structures, Theory of Computing, Cloud Computing

Projects:

12/2021 – 05/2022

STRapp – Seizure Technical Response Application

- Developed an Android application to help people that have seizures by first detecting a seizure using a custom-built wrist device and then sending a text message to emergency contacts.
- Made sure user's journal data was stored securely in Firebase Realtime storage.

1/2023 - Present

Secret Santa Website – Easy way to set up secret santa for the holidays

- Designing a website using Flask, CSS, and HTML with Firebase as the database.

Skills:

- **Git Version Control** - I can complete simple tasks using Git and GitHub like making pull requests, fixing merge conflicts, and maintain organized branches.
- **Programming Languages** - I have a good understanding of Python, C#, Java, and JavaScript. I am capable of learning new languages quickly.
- **Software Development** - I have experience in Agile software development and SCRUM.
- **Database Management** - I have experience in both No-SQL and SQL databases like MySQL and Firebase real-time storage.
- **Data Mining** – I have experience with Python Pandas and Rapid Miner by following the CRISP-DM methodology.
